## Poinsettias

### A Christmas Tradition

Often times as people decorate for the holiday season they forget about the beauty and warmth that poinsettias can bring to a room.

These magnificent beautiful plants can be used as a center-piece on your table, a filler on an end table or fill an empty spot that you may have in your room. Wherever you put these plants, they will add beauty.

We have a large variety of poinsettias in a wonderful range of colors, from burgundy, red, pink, mauve to white.

Please remember poinsettias are **not** poisonous!

**P.S.** Poinsettias make a wonderful Holiday Gift. During our Poinsettia Festival (November 23, 24 & 25) these flowers will be eligible for a 10% discount.

### APPLE CIDER DONUTS

In 2013 we begin making "homemade" apple cider donuts covered in light coating of cinnamon and sugar. Everybody enjoyed them. So this holiday season we will make lots of apple cider donuts. We will sell them individually or in one half dozen bags

**P.S.** Have some hot mulled cider while you are visiting the farm.

Our ladies have really used their creativity in assembling winter baskets for your front porch or in front of your fireplace. They have selected colorful containers or natural containers (such as white birch) and filled them with an assortment of fresh greens – balsam fir, noble fir, incense cedar, blue juniper.

To complete the holiday happy look, they have added winter berries, bright ribbon, and sparkling balls.

## Real Tree Care Facts

### Real Tree Care

A few simple care tips will enhance the enjoyment of your Christmas tree and keep it fresh and fragrant throughout the holiday season. Keep the tree outdoors, standing in a container of water, protected from the wind and sun until you are ready to decorate. This will help the tree retain its moisture.

Before bringing the tree into your home and placing it in a stand, make a fresh cut a minimum of one-quarter inch off the base of the trunk. This opens the tree stem so it can take up water. Immediately place your tree in the stand and fill it with fresh water. If you allow the water level to drop below the fresh cut, a new seal will form over the stem. Use a water-bearing stand with a capacity of a gallon or more.

**Note:** We sell stands which have a large water reservoir.
